ORDER DETAILS

Calf Cuff Position:

☐ Anterior

Recommended Patient Indications:
- Low to moderate activity levels
- High leg instability requiring a more rigid AFO to control the ankle joint
- Basic usage activities such as level ground ambulation

☐ Posterior

Recommended Patient Indications:
- Moderate to high activity levels
- Lower leg instability allowing for a more flexible AFO
- Varying usage activities where a less restrictive and more dynamic support level is preferred

Valgus Correction:
☐ Velcro Spacer Kit
☐ Built-In

Varus Correction:
☐ Velcro Spacer Kit
☐ Built-In

*If Built-In correction is selected, please include details in the special instructions box.

Hinge Torque:
☐ Standard
☐ MAXX Tension

Extension Limits:
☐ Insert Kit - Adjustable from 5 - 20 degrees at 5 degree increments
☐ Built-in Kit - Pre-set to desired angle. Enter built-in degree value: _____°

ANKLE COMPONENT

AFO Type:

☐ Standard - Thrive, Carbon Fiber Shoe Size _____ (US Size)
☐ Other* _____

*If Other is selected, you will need to ship your AFO of your choice to Icarus for assembly.

ADDITIONAL OPTIONS

☐ Additional Engraving (+$25)
☐ Extra Padding (+$50)

*Please include details for any customization in the special instructions box.

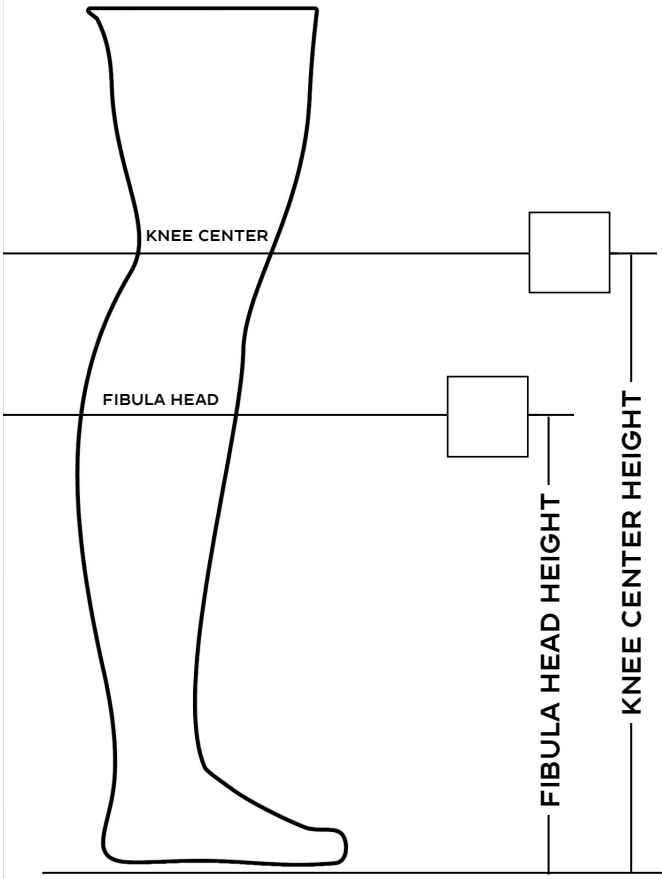

ATTACHMENT

☐ Permanent - AFO permanently fixed to KO using pre-drilled holes with barrel bolts.
☐ Rapid Detatchment - Slide lock with snapping cap, allows KO and AFO to be quickly separated if desired

609 E MARKET STREET, SUITE 114, CHARLOTTESVILLE, VA 22902

MEASUREMENTS

Knee Center To Floor:

- Defined as the vertical distance from the apex of the lateral condyle to the floor.
- The measurement should be taken perpendicular to the floor, with the patient standing barefoot and upright.

The position of the KO hinge will be set to the provided height value, based on Icarus's definition of knee center to floor.
