VOXELCARE PARTNER FOR CANADA

VOXELCARE · PELLET 3D PRINTING

Multi Pellet 3D Printer *CUBE.*

Print fully custom, multi-material foot orthotics in your own clinic. The VXC3DP Multi Pellets CUBE uses Fused Granulate Fabrication (FGF) to print recyclable TPU pellets, driven by Voxelcare's online design and slicing software. Supplied, installed, trained and supported across Canada by Dynamic Lab Services.

FGF	4×	85A–100A	Single / dual
FUSED GRANULATE FABRICATION	PELLET CARTRIDGES	TPU SHORE HARDNESS	CUBE SETUPS

- Multi-colour, multi-material, multi-hardness, multi-zone and multi-pattern insoles in a single print
- Works with Voxelcare Online CAD and the 3D laser foot scanner
- Up to 60% savings compared to outsourcing
- Automated material changes and online slicing software
- Recyclable TPU pellets, minimal waste, no moulds
- Designs stay in-house: no need to share patient files

Infinity Automation · non-stop production

Proprietary PET foil print surface, automatic unloading, up to 3 days of production collection capacity and storage for 32 pellet cartridges. Print more orthotics with fewer operator interventions. Contact us for a quote.

*Monthly figures are lease-to-own estimates through our Canadian financing partners, before tax and on approved credit. Rates are estimates and may not be accurate for everyone; your actual payment depends on the lender, term and credit approval. A 10% early buyback is available at the end of the buyback period. All prices in CAD, before applicable taxes. Air freight and duties quoted separately or rolled into your lease. Each column shows the estimated monthly payment with the buyback at that month (lease terms of 27, 40, 53, 65 months respectively). Prices and specifications subject to change without notice.
